

# THE BELT RAILWAY COMPANY OF CHICAGO

## TRAIN DISPATCHER NOTICE #2018-D012

Effective 0001, September 14, 2018

**To: Train Dispatchers, Clearing**

**Subject: Application of GCOR 6.4.1, Reverse Movement**

When on track authority for a Roadway Worker is granted behind a train, the Train Dispatcher must take the following steps to assure the protection of the working limits from the train making a permissible reverse movement within the same block, under the provisions of GCOR 6.4.1, Reverse Movements:

- Notify the train that on track authority (working limits) have been issued behind the train, within the same limits.
- Notify the train that they may not make a reverse movement, even within the same block, without obtaining permission of the roadway worker that has been authorized to occupy the track.

Note that this is only applicable when authority has been granted behind a train and does not apply when joint authority has been issued to both movements.

C. L. Gorski  
Superintendent-Transportation
